Introduction

This Reference Guide has been written to supplement the training provided on the Introduction to Surveying Course. As well as having a printed copy of the guide available for the duration of the course, students will be given a copy on CD-ROM and have access to it at other times via the RoS intranet.

The course has been divided into the eight main topics listed in the contents pages overleaf. Each topic is the subject of a training presentation and/or exercise, and each one has a separate section in the reference guide.

A number of the reference guide sections draw upon the information available on the Ordnance Survey website which is an excellent source for information and which is being constantly updated: www.ordnancesurvey.co.uk.

Other references are given throughout the course of the Reference Guide, usually in the form of footnotes. Each section is concluded by a review of the key points.

Contents

Section	Title	Page
Section 1	Ordnance Survey, Background Information	
	Concise history of OS large scale maps	1
	Some more details – 1:2500 mapping	5
	Background to 1:2500 National Grid plans	5
	Digital conversion	11
	Key points from this section	12
Section 2	Ordnance Survey, Large Scales Map Data	
	The quality of OS large scales data	13
	Lineage	13
	Completeness	15
	Positional accuracy	15
	Temporal accuracy	19
	Logical consistency	20
	Attribute accuracy	21
	OS revision policy for basic scales products	22
	Revision controlled by graphic survey	25
	Data quality: maps fit for purpose	27
	Key points from this section	28
Section 3	Survey Methods and Practice	
	Overview of OS basic scales	31
	Methods of survey	31
	OS selection of methods	34
	Basic principles of basic scales survey	36
	OS large scales data – specification	39
	Survey instruments	49
	Key points from this section	54
Section 4	The Registration Process	
	Introduction	55
	Procedures - RoS	56
	Procedures - OS	60
	What to consider before requesting a check survey	62
	From the surveyors perspective – the requisition	65
	Example case – Doune Road	67
	Key points from this section	69

Contents cont....

Section	Title	Page
Section 5	Land Surveying: Detail Survey	
	Types of survey	71
	Principles of survey	72
	Detail survey – what to survey	73
	Detail survey – how to survey	74
	Graphic survey	77
	Ground surface measurements	85
	Key points from this section	90
Section 6	Potential problems in the use of OS mapping	
	Introduction	91
	Real errors	91
	Historical background	92
	Positional accuracy	92
	Dates of revision	93
	Specification	94
	Scale – and survey accuracies	99
	Key points from this section	101
Section 7	Ordnance Survey data products	
	Introduction	103
	OS MasterMap	103
	ADDRESS-POINT	106
	Other large scale products	108
	Medium scale products	109
	Small scale products	110
	Thematic products	111
	Key points from this section	113
Section 8	Ordnance Survey – current issues	
	Introduction	115
	Positional accuracy improvement	115
	CODES and Land-Line Pre-Build	120
	GPS	121
	Key points from this section	128
